## SITUATION SUMMARY

## **Cal OES Activation Status**

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Normal Operations	Normal Operations	Normal Operations	Normal Operations

### **Cal OES COASTAL REGION**

Nothing significant to report.

### **Cal OES INLAND REGION**

· Nothing significant to report.

### **Cal OES SOUTHERN REGION**

### **Telecommunications System, Cal OES Southern Region (Updated)**

On 02/26/18, Cal OES Southern Region had pre-planned network maintenance at the base. As a result; all lines, data, phone and internet will be inoperable through 02/27/18.

- Contractors, Cal OES Information Technology (Cal OES IT) and Tactical Communication (T-Comm) have been advised and are addressing the issue.
- Alternate communications methods were tested and are in place should the Cal OES Regional Emergency Operations Center (Cal OES REOC) warrant activation.
- The Cal OES Southern Duty Officer (Cal OES SDO) and Information Technology Duty Officer (Cal OES TDO) are monitoring and providing updates as they become available.

# Service Interruptions:None reported.

# **WEATHER OF CONCERN**

### **Weather of Concern**

• A cold storm system will bring snow to the Southwest California mountains and some foothill locations through this evening. There will be snow accumulations of 2 to 6 inches across the northern slope of the Los Angeles and Ventura County Mountains and the San Gabriel Mountains of Los Angeles County.

### **Active Weather Warnings, Watches and Advisories by County:**

https://alerts-v2.weather.gov/counties/CA

## **WEATHER SYNOPSIS BY REGION**

#### **NORTHERN CALIFORNIA**

There will be a series of cold, wet weather systems move through the region over the next week and likely beyond that. There will be a dry, somewhat warmer break between systems Tuesday followed by a stronger cold system arriving Wednesday and lasting into the weekend. Conditions over the weekend will be more showery with precipitation decreasing.

There will also be a chance of some thunderstorms, mainly late this week. There will be some periods of gusty winds this week too, starting with northerly winds today, then becoming southerly Wednesday into Thursday with lighter northerly winds over the weekend. The strongest gusts will mostly be 25-35 mph, but gusts to around 40 mph will be possible locally too.

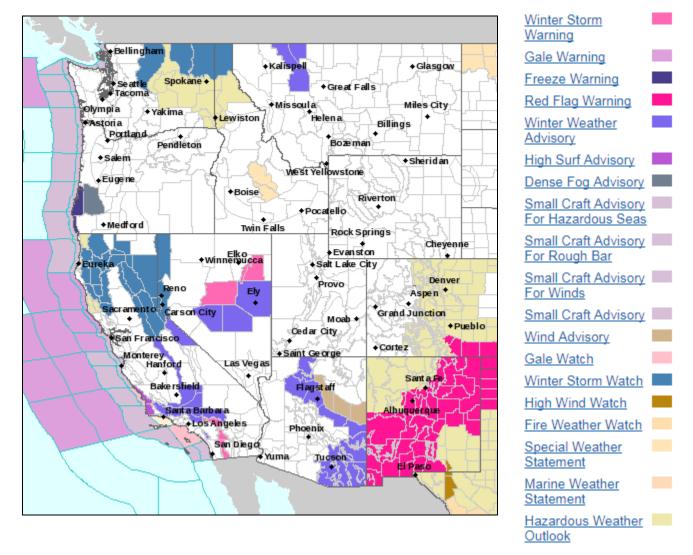

Snow levels will be rather low this week, as low as 1000-1500 ft in the north at times to 2500-3000 ft in the south. This will make for some winter driving conditions over many of the mountain pass roads this week. It seems likely that the lower elevation passes could see 3-6 inches of snow on the road with around 10 inches, locally more on the higher elevation roads. Temperatures will remain below normal and at least 10 degrees below seasonal values later this week.

#### **SOUTHERN CALIFORNIA**

A storm moving south from the Pacific Northwest will bring scattered showers to the region through Tuesday afternoon. Most locations will receive less than a half inch of rainfall, but some mountain locations will receive up to an inch of rainfall. The snow level will be around 3,000 feet. South to west winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas through Tuesday morning. Significant cooling will occur through Tuesday. Temperatures will be in the upper 20s and 30s across the mountains and mid 40s to mid 50s in the valleys Tuesday. There will be a break in storms Wednesday causing temperatures to warm a few degrees and winds to become light. Another storm will bring showers to Central California starting Thursday morning and to the region starting Thursday night. Showers with this storm will continue through Saturday. This storm looks to be a little wetter than our recent storms, with most locations expected to receive between a half inch and an inch of rainfall. However, the Central Sierra and the Big Sur Coast will likely receive between 1 and 3 inches of rainfall. The snow level will be around 5,000 feet with this storm. South to west winds of 20 to 40 mph with gusts to 60 mph will surface across the mountain ridges and desert passes Thursday afternoon through Saturday. Temperatures will continue to be well below normal Thursday through Saturday. A weak ridge of high pressure will build into California from the Pacific Ocean causing temperatures to warm to near normal and winds to become light across the region Sunday through early next week.

# **Cal OES LAW ENFORCEMENT MISSIONS**

### **Cal OES Law Missions**

Nothing significant to report.

### Cal OES MISSION TASKING

### **Cal OES Missions**

- 2018-IREOC-45244: Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties.
- 2018-Southern-44905: Communications support, Baker to Vegas Annual Challenge Cup, San Bernardino County (Coordinating)
- 2017-SOC-44098: CalRecycle Debris Management Team in Ventura County
- 2017-SOC-44022: Two E-BAM (air monitors) from Air Resources Board/Office of Emergency Response to monitor smoke from the Thomas Fire. Location one: Olga Reed Elementary School (480 Centennial St., Los Alamos); Location two: Carpinteria City Hall (5775 Carpinteria Ave., Carpinteria) (On Scene)
- 2017-SOC-43821: DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- 2017-Inland-42559: Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)

### Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
